MASTER DRESSING — VINCENT VAN DUYSEN 2015

1—

Following the success of Gliss Master, Vincent Van Duysen has designed Master Dressing, a walk-in wardrobe system that completes the wide range of nightime systems offered by Molteni&C. Master Dressing perfectly complements the Gliss Master wardrobes thanks to the use of coordinated internal fittings and aesthetic finishes, thereby providing functional and impactful walk-in closets. A distinctive structural feature is a new rack system to which wooden, lacquered, Fine Grain or glass back panels can be hooked. The system is fitted with newly designed shelf support rods that will take 30 mm thick Ecopelle and illuminated glass shelves, or 40 mm thick wooden shelves. Newly designed sets of drawers, new tie and foulard rack accessories. Brand new "Vanity" compartment, complete with large illuminated LED mirror.

MODULARITY

Linear modulesStandard compositions are built in the same heights as Gliss Master (H 2919, 2631, 2439, 2343), and widths are decided based on the 798/962 mm module plus 42 mm at the beginning and end of the composition (if the composition is set between two walls). Modules can be reduced in both height and width.

It is possible to reduce the depth of the following components up to a maximum of -160 mm (from 538 mm to 378 mm):

- bases
- wood shelves th 40
- glass and Eco Skin shelves th 30

Corner modulesWith Master Dressing, it is possible to create L-shaped or C-shaped corner compositions. To design these compositions, in addition to the centre distance of the standard module (798/962 mm) and the starting distance (42 mm), it is necessary to consider the measurements of the corner (65 and 604 mm) as shown in the examples below.

Drawer units

Wood shelves th 40 and Eco Skin shelves th 30 can receive the wall-mounted drawer unit structures. In this case, it is advisable to not place them side by side because the drawer units would not be aligned.

Floor-standing drawer units or on bases, cannot be aligned with closet shelves.

Structures can receive several drawers or travs in compliance with the modularity indicated with the dots .

Drawers and trays are fitted with HOLD or CAVE handles.

For the CAVE handle covered in Eco Skin, add a supplementary charge each.

LIGHTING

LED Lighting

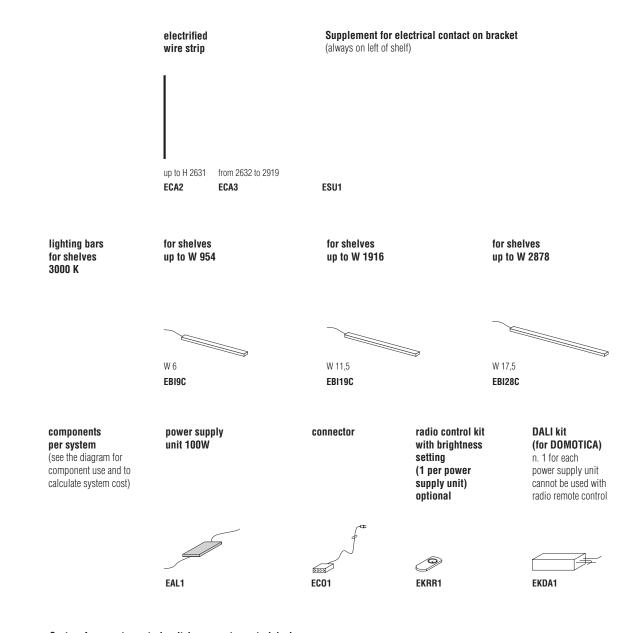

Shelves in wood, Eco Skin and glass can be outfitted with LED lighting. The wiring system is compliant with European safety standards. To allow the closet to be lit simply and quickly, the fixing profiles are wired with an electrified wire strip (see example on p.12) and the brackets are fitted with contacts.

Notes

When placing the order, the client must indicate on the drawing which shelf or shelves are to be fitted with the lighting bars. Bars are always aligned with shelf width.
